

Prof. Ihn Han
Kwangwoon University,
Republic of Korea

Dr. Ihn Han is research professor of Kwangwoon University, South Korea, working in the “Plasma Bioscience Research Center/Applied Plasma Medicine (<http://pbrc.or.kr>, <http://apmc.or.kr>) since 2014. Her research project is mainly oriented towards plasma biomedical applications and plasma treated liquids. Dr Han completed her training in the department of Biomedical Engineering at College of Medicine in Kyung Hee University, Seoul, Korea in 2012. Her major is Cell biology and stem cell engineering.

Moreover, since 2015 she is focus on the project “Functional regeneration of stem cells by plasma therapy” at PRRC/APMC in Kwangwoon University. Since 2016, she was winner of the “Young Scientist Award”, “Best Presentation Award” and “Best Poster Award” and she has presented the plasma outcomes as “invited speakers” at the many of International Conference.
