

Prof. Kiwon Song
Yonsei University, Republic of Korea

Dr. Kiwon Song is a full professor of the Department of Biochemistry at Yonsei University in South Korea. Prof. Song received her Ph.D. in 1994 in Biochemistry, Molecular and Cell Biology from Cornell University, USA and trained as a post-doc for 2 years in the School of Medicine at Vanderbilt University, USA. In 1996, Prof. Song became a faculty member at Yonsei University. Since then, Prof. Song's research has focused on the control mechanism of cell cycle and cell proliferation. In last 10 years, her research area of interest has expanded to the control of cell proliferation and death with atmospheric pressure plasma and its molecular mechanism.
